Eco-friendly unique ceramics

Union of Artisan Ceramic Manufacturers

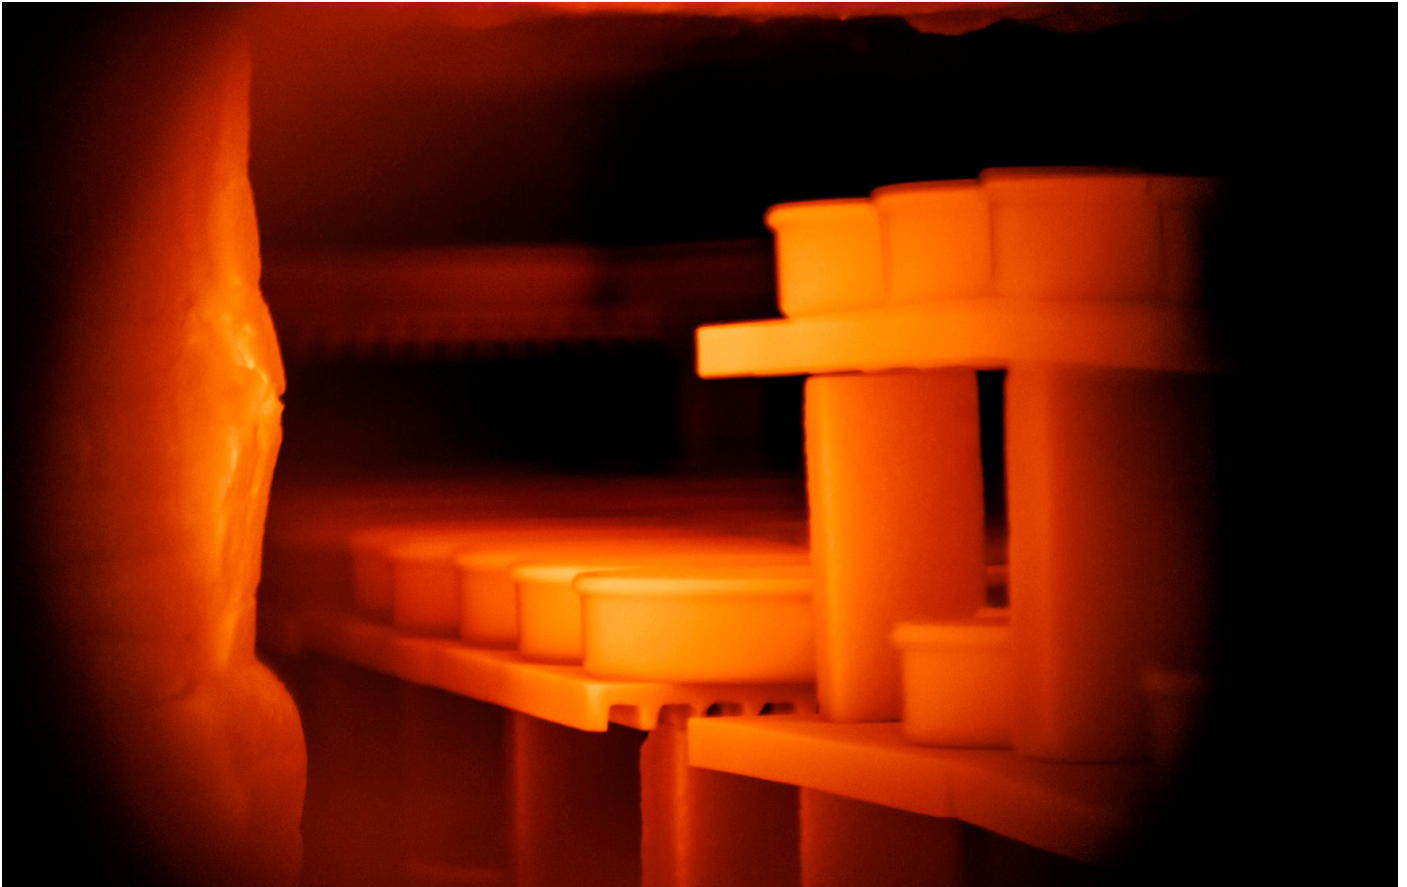

History of Central Terrissaires de Breda

We are artisan potters specialized in the manufacture of all types of containers for the food, cosmetics, gardening and decoration sectors. We also produce traditional ceramic cookware such as casseroles, cocottes and tagines, as well as tableware items including plates, salad bowls, trays, glasses, jugs and cups.

With a long-standing track record, the most advanced techniques and a careful selection of the most suitable clays, we offer high-quality products that are strong and durable.

Founded in 1952, La Central was created through the union of several families with a deep ceramic tradition, inheritors of a craft passed down from generation to generation. Today, we proudly preserve this legacy by combining artisanal know-how with technological innovation to continue offering authentic, sustainable products of the highest quality.

Eco-friendly and sustainable product

Ceramics is, by nature, the most sustainable and eco-friendly material on the market: it comes from the earth, is durable, does not pollute, and can be reused or recycled, completing its own life cycle.

We manufacture three product families —**cookware** ceramics, **table** ceramics, and ceramic **containers**— with distinct characteristics tailored to different uses and sectors.

All pieces are made from clay, a natural and abundant raw material, and are finished with ceramic glazes that comply with the most stringent European regulations. The result is a range of products crafted from nature's essential elements —**earth, water, and fire**— designed according to principles of sustainability and environmental responsibility.

Quality ceramics

In 2002, we obtained the ISO 9001:2015 Certification for the production and marketing of artisanal clay specialties, a recognition that endorses our commitment to quality, traceability, and continuous improvement of our processes.

At CTB, we understand ceramics as an expression of balance between tradition, nature, and innovation. Each piece reflects our way of understanding the craft: respectful of the environment, true to craftsmanship, and focused on offering the best service and the highest quality.

Ceramic cookware

Specialists in the production of casseroles, cocottes, and tagines, we keep the ceramic tradition alive while adapting it to the demands of modern cooking.

Our products distribute heat evenly and are suitable for gas and ceramic hob.

They combine functionality, durability, and aesthetics, ideal for both professionals and amateur cooks who appreciate the flavor of traditional cuisine, heir to an ancient technique.

Ceramic Tableware

A collection designed to dress the table with authenticity and elegance. It includes plates, salad bowls, trays, glasses, jugs and cups, created to bring warmth and character to any setting.

Each piece reflects a balance between craftsmanship and contemporary design, featuring carefully finished surfaces and natural materials that ensure durability and lasting beauty over time.

Ceramic containers

Designed to meet the needs of the food, cosmetics, gardening and decoration sectors, our containers offer a natural, eco-friendly and recyclable alternative to plastic and other materials.

They are strong, versatile and customisable, making them ideal both for the presentation of gourmet or artisan products and for design projects seeking a distinctive and sustainable value.

Customizations

We adapt to you: we design and offer solutions according to your needs. Tell us what you need, and we will help make it a reality.

ECO-FRIENDLY AND SUSTAINABLE CERAMICS

Natural and non-polluting raw material

Our raw material is **clay**, a completely natural, abundant, and environmentally friendly material. We use **ceramic glazes** that comply with the most demanding European and international regulations, free from lead and cadmium, making them fully ecological products.

For this reason, at CTB we feel fully committed to the **protection of the environment**, and we work every day to contribute with our small grain of sand.

At CTB, we work every day with a commitment to protecting the environment, ensuring that our production maintains a balance between industrial activity and respect for nature.

Committed to the environment

Each piece can continue living in many ways: as a container for new products, as a decorative element, or as a base to present that unexpected dish that surprises everyone. And when its journey ends, it simply returns to its origin, the earth, to begin its natural cycle anew.
